

Invitation to the
International Aerospace Forum:

More than an
exhibition!

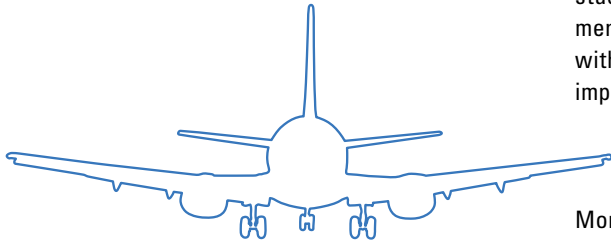

Save the date

24 - 26 November 2015 in Kirchheim unter Teck, Germany

The first event in
Makino's largest
technology centre
in Europe:

Heavy cutting of metal,
time and costs!

With a series of events in Makino's technology centres across Europe, we offer exclusive presentations, live machine demonstrations and challenging state-of-the-art production technologies that fit your needs. Our very first event in our newly expanded facilities in Kirchheim features a special focus on Aerospace and Die & Mould applications.

In addition to the introduction of our latest innovations, we put together a supporting programme which will give you ideas how to improve your productivity through optimizing your processes. With compelling case studies presented by Makino users, presentations on future market developments as well as the possibility to exchange knowledge and experiences with other experts in the field, we can offer you a menu of enlightening impressions in a spectrum of interesting areas.

Save the date in your calendar now: **24 - 26 November 2015**

More information will be sent to you soon in a special invitation.
We look forward to meeting you in Kirchheim!

Best regards,
