# Welcome to the 2021 Subcontractor Sourcing Guide

**2020 will go down in the annals of history as a year unlike any other.**

COVID-19 has wreaked havoc amongst families, companies, schools, universities and businesses. Unprecedented has become a somewhat overused word but nothing else really describes what the human race has been through quite so profoundly. Words and phrases like social distancing, flattening the curve, shielding and sanitising are now interwoven into our everyday language.

In manufacturing, even through the darkest days of the pandemic, the subcontract fraternity kept things moving in what proved to be the greatest collaborative effort since the Second World War. VentilatorChallengeUK brought out the best in all that's good about UK manufacturing. Companies rallied together, lending their skill and expertise to ensure equipment was supplied where it was needed most – on the frontline.

This wasn't about making profit – it was all about making a difference – indeed some companies barely broke even or actually made a loss. It didn't matter. When the going got tough, the tough got going.

The nation's army of subcontracting engineering

companies remain the backbone of the UK manufacturing industry – its very lifeblood. Whatever service you need, there's a ready, willing and able subcontractor out there that will provide exactly what you want, when you want it and at the right price.

For procurement professionals however, finding the right company can be a minefield – which is where our 2021 Subcontractor Sourcing Guide comes to the rescue.

We designed it to be simple to use. Need to find a supplier well-versed in manufacturing components for the motorsport market for example? No problem. The guide lists subcontractors by specific skillsets and expertise. Need some complex aerospace parts made? Simple. Look for companies that are accredited to AS9100.

New for the 2021 edition is the introduction of QR codes to take you directly to a subcontractor's website.

It's all there. We've done the work so you don't have to!

# SUBCONTRACT SAWING

Splitting horizontally

Sawing for investigation

Inspection & test

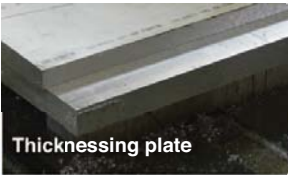

Repurposing with horizontal cutting

Specialists in subcontract sawing of any metal, ferrous or non-ferrous, to resize stock material, recover or reuse material or enable internal inspection and testing of castings and forgings prior to full production. We can handle up to **25 tonne** loads, 2000mm dia, 8000mm long, and sometimes **bigger**. Call for more information.

Casting feeder removal

Thickening plate

Excessing

Development

Bulk removal

## Advantages of sawing:

- No material deformation through pressure
- No heat affected zones - minimal machining or waste
- No damage to base materials - cold process
- Cutting of section up to 2000mm thick and 4000mm long
- Reusable offcuts - not turned into expensive swarf
- Enables recovery and reuse of metals or re-purposed castings, forgings, machined components cost effectively
- Sectioning of large components for inspection and test pieces

# MANUFACTURING PRECISION MACHINED COMPONENTS SINCE 1965

Our team ensure **precision**, **accuracy** and **customer service** at every stage of your journey with us.

## MACHINERY INCLUDES:

- 12 CNC multi-axis sliding head machines from Citizen and Miyano, all with live tooling and sub-spindles running from 3mm dia. to 42mm dia bar. Also with LFV technology for swarf control.
- 4 larger capacity fixed head multi-axis machines from Mazak and Goodway with through spindle capacity up to 76mm, live tooling, sub-spindle and both Y & C axis.
- 6 fixed head CNC lathes from Hardinge and Mazak with spindle capacity up to 42mm dia.
- 4 dedicated machining centres from Kitamura, YCM and Victor. Two with twin pallet loaders and two with full fourth axis systems. SolidCAM programming suite.
- Modern inspection facility including OGP CNC Smartscope video measuring system and Mitutoyo Crysta CNC CMM. Facilities for laser etch and dot etch to fulfil any marking requirements.

## MATERIALS:

We work with:

- Aluminium
- Mild steel
- Stainless steel
- Brass
- Plastic
- Titanium

# GOULD ALLOYS

THE LEADING EDGE IN METALS

When you supply some of the world's most demanding markets, you need to be on top of your game. Gould Alloys is a leader in the stockholding and distribution of high integrity ferrous and non-ferrous metals.

We carry a comprehensive range of stock in both aerospace and commercial specifications/alloys including:

- Alloy Steels
- Stainless Steel
- Aluminium
- Nickel Alloys
- Titanium
- Phosphor Bronze

We offer:

- A wide range of processing options including radiused, chamfered, turned, bored/hollowed
- Cutting to weight or length options
- Sawing facilities for bar and plate
- Machine Shop (including CNC lathes, milling machines, turning centre)
- Water jet cutting

# INFLITE ENGINEERING

**Inflite Engineering Services** is an industry leader within the manufacturing sector, offering a full turnkey solution to various supply chains. Inflite specialises in CNC Milling, Fabrication, Fitting and Surface finishing of hard and soft metals based at three facilities in the South East of England.

Inflite's CNC machining facility (Stansted, Essex) processes both small components to large complex parts with its 3, 4, and 5 axis capabilities and can accommodate 5 axis Milling up to 7m long by 4m metres wide. Inflite operates state of the art technology from Matura, Handtmann, Mazak, Hurco, Hermle, including Multi Pallet Machines, CNC Turning and additive manufacturing. Inflite's facility based at Bishops Stortford (Herts) is focussed on the fabrication, welding, Heat treatment and Assembly of sheet metal parts. Its capabilities include waterjet profiling, 5 axis routing, stretch forming and wheeling. Inflite's third site (Chelmsford, Essex) is a NadCap approved Surface Treatment plant, offering capabilities that include anodising, prime, top coat paint and a multitude of metal treatment and testing. Inflite holds NadCap approvals for welding, heat treatment, Non Destructive Testing and Chemical Processing and a range of other approvals across Aerospace and Defence in particular.

98% of Inflite's work is completed in house, reducing cost and delivery times in comparison to a sub contracted supply chain. Inflite provides Tier One Primes and Original Equipment Manufacturers a competitive advantage by applying the latest technologies and a comprehensive in-house service to offer a cost effective and delivery focussed solution. From simple components, large complex milled parts into high level assemblies, with everything in between, Inflite has the ability to take on small, urgent batch runs up to full, longer term production deliveries.

## Services We Offer

- ◆ **CNC 3 & 5 Axis Waterjet Part Cutting** - of metal, engineering plastic, plywood, phenolic, HPL & G10 laminate sheet & sandwich panels, ceramic & ballistic plates up to approx. 4m x 2m x 300mm thick (longer lengths possible), with 5-axis cutting capabilities up to 60 degrees.
- ◆ **CNC 3 & 5 Axis Milling/Routing** - of small precision & large parts up to 2.5m x 1.5m x 600mm.
- ◆ **Foam/Balsa Core Abrasive Wire Cutting** - up to 3m x 2.2m x 300mm thick.
- ◆ **Reinforcement Fabric/Prepreg Cutting** - up to 2.6m wide, using CNC knife cutting conveyor tables to cut precision shapes and lengths from 2D & 3D glass/carbon/aramid fabrics, prepregs, adhesive films, peel-ply & surface veils & other technical fabrics, plus roll slitting.
- ◆ **Composite sandwich panel making & cutting** - up to 4m x 2m x 100mm.
- ◆ **2D Preform Kit Design & Assembly** - of multilayer bonded composite fabrics & cores.
- ◆ **Kitting** - fully traceable kits supplied with customer part identification & alignment markings, sequentially packed for high efficiency and ease of use on the shop floor.
- ◆ **Digital Engineering, 3D Scanning & Prototyping** - including kit design & surface flattening.

Why Choose Us? ■ **Reliable, consistent quality service**

For commercial and aerospace alloy applications, Righton Blackburns has been a trusted supply partner for over a century.

Our experience and expertise extends across a wide range of materials, including:

- Aluminium
- Stainless steel
- Brass
- Copper
- Nickel alloys
- Aluminium bronze
- Phosphor bronze
- Leaded bronze
- Copper nickel
- Bearing steels
- Titanium
- Engineering plastics

In addition, we are the exclusive supplier in the UK of Hardiall®, a high hardness and low friction copper alloy designed for use in extreme conditions.

We offer a reliable and efficient delivery service from locally held stocks for standard, non-standard or customer-specific material. For a dedicated complete supply package to meet your specific requirements, **choose Righton Blackburns.**
